### Situation Overview

- **California State of Emergency Proclamation**

On March 4, 2020, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the State prepare for broader spread of COVID-19.

- **Global Health Advisory**

On August 6, 2020, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on March 19, 2020, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov>.

- **Executive Order N-33-20**

On August 28, 2020, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **FEMA-4482-DR-CA**

On March 22, 2020, President Trump approved Major Declaration FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

\*Public Health has identified an additional 806 COVID-19 -associated deaths that were not initially recorded as COVID-19 deaths. The majority of these deaths occurred during the surge between December 3, 2020 and February 3, 2021, a period when many deaths occurred and not all were reported to Public Health due to the volume of records. Public Health identifies COVID-associated deaths primarily by submission of Death Report Forms from healthcare providers. A review of vital records, delayed by the high volume of Death Report Forms during the surge, identified the additional deaths.

### Fire/Law Enforcement Task Force

- Confirmed a total of 50,991 (+1,114) COVID-19 fatalities in California
  - LA County's fatality report is extremely high with over 1,100 fatalities for today. Per LA County, several counties reported problems with CDPH's automated systems resulting in delayed reporting. Through extensive checks of death records, Public Health has identified an additional 806 COVID-19 associated deaths that were not initially recorded as COVID-19 fatalities. The majority of these deaths occurred during the surge between December 3, 2020 and February 3, 2021, a period when many deaths occurred and not all were reported to Public Health due to the volume of records. Public Health identifies COVID-19 associated deaths primarily by submission of Death Report Forms from healthcare providers. Additionally, vital records are used to identify deaths related to COVID-19 by reviewing the cause of death listed on death certificates. This review of vital records, delayed by the high volume of Death Report Forms during the surge, identified the additional deaths. Public Health has already reported 9,712 deaths that occurred between December 2020 and January 2021, and were reported through Death Report Forms. Therefore, 92% of deaths that occurred during that period were previously reported.
